Welcome home

Sea, land, history, architecture, gastronomy, sun, fun... Palma has it all! This cosmopolitan city is the perfect place for families, especially the kids, to have a fun, surprising and unforgettable experience. Its bay, Playa de Palma, stands out as a spectacular window on the sea, where you can enjoy the Mediterranean, its sun and its beaches to the full. And all this in maximum tranquillity because it is a safe, open, and welcoming destination. Always respectful of the diversity that has characterised life in the Mediterranean for thousands of years.

In this special guide for families, you will find the various tourist, historical and cultural proposals to help this city to maximise and to enjoy the best of the Mediterranean. But you won't do it as a visitor, because from the moment you and yours land or go to the port, you will feel like a family of „Palmesanos“ like everyone else, just as if you were at home.

This is what this city and this island are like. Last year's award of the Unicef „Child Friendly City“ seal only shows Palma's sincere and original commitment to making children aware of this city, to discover, taste, learn and play... A place where the sea and the sun are the perfect complement to enjoy castles, forests, patios, walks and parks, leisure facilities... What do we want to play today?

A silhouette of a man and a child looking at an aquarium tank filled with various fish. The scene is bathed in blue light, creating a serene and immersive atmosphere. The man stands in the center, looking towards the tank, while the child stands to the left, also looking at the fish. The tank is filled with numerous fish of different species, swimming in the water. The overall mood is peaceful and family-oriented.

› Es Carnatge, nature and history

Discover this natural coastal strip, just 5 kilometres from Palma, where fauna and vegetation coexist with fossil remains and traces of past civilisations that allow us to learn about the history, culture, and traditional uses of the region. Cala Pudent, a coastal area of geological interest with elements of cultural heritage such as Les Cases des Carnatge or El Cuartel (The Barracks), is worthy of special mention.

- Elements of the heritage of the defence, such as the cannon positions, the trenches, and tunnels and the Marés quarries. In different areas of Es Carnatge you can find fossils and traces of organisms that give us an idea of what life and the environment looked like in the past. One of the most interesting, because of its exclusivity, is the footprint of a *Myotragus*, a mammal that lived on the Balearic Islands 5.7 million years ago. A note: it is in the quarries. Do you dare to look for it?

Es Carnatge has small sandy coves and rocky accesses to the sea, as well as a promenade with access to Cyclists and pedestrians.

Sendero Azul (Blue Path)

A good way to discover the Carnatge area and its surroundings is the coastal road of Palma, which links the Blue Centre, known as Sa Petrolera, with its environmental education activities on coastal ecosystems and sustainable development, with the Cala Estancia beach, which has been awarded the Blue Flag. Further information and complete itinerary at: www.rutalitoral.palma.cat.

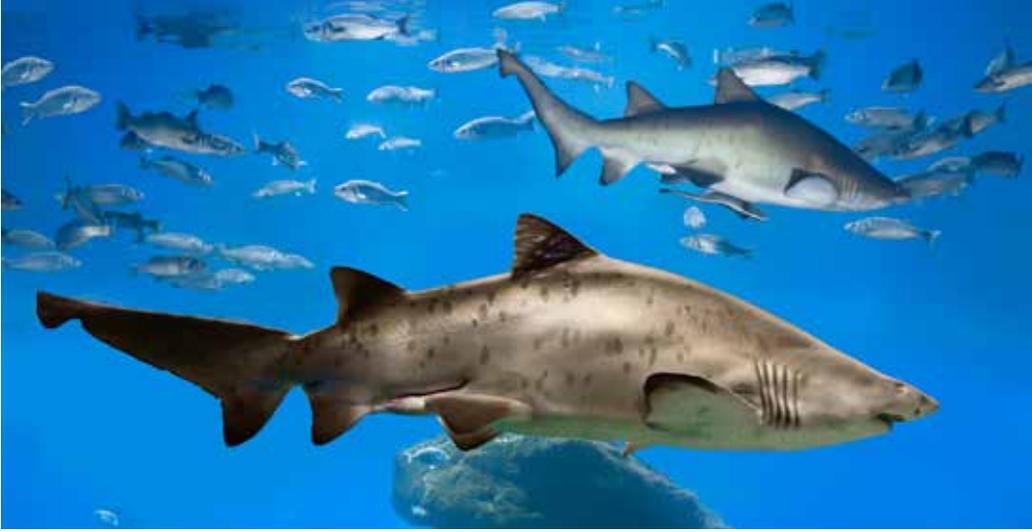

Na Galera (islet)

The Na Galera (islet) rock, surrounded by *Posidonia* meadows, lies in front of the Son Caios cove, 150 metres from the coast and separated by a shallow strait. The discoveries made here make it one of the most important sites of the Punic period in the western Mediterranean. The site shows important traces of human presence, among which the remains of a Punic sanctuary, built between the 4th and 3rd centuries BC with large Marés stones, stand out.

Es Carnatge is a privileged place in Palma and has been declared a Centre of Cultural Interest (CIC), and also a Natural Area of Special Interest (ANEI) because of its paleontological interest.

On the other hand, the Na Galera islet has been classified as a Cultural Heritage of Cultural Interest (BIC).

▶ Cathedral of Mallorca

📍 Plaça Almoina, s/n
catedraldemallorca.org

This impressive temple on the shore of the sea is called the „cathedral of light“ and is considered one of the most spectacular and beautiful examples of Mediterranean Gothic. Its symbolism is not only religious, but also ecological, because the cathedral is the only temple reflected in the waters of the sea. With the subsequent construction of the Parque del Mar, this old effect was intensified, and now the beautiful temple is reflected in the artificial saltwater lake of the parks; the lake symbolises the sea that once reached the city walls themselves. Inside, the beauty and stylisation of the Gothic style is combined with the ecclesiastical heritage and the atmosphere of devotion. In addition, there is an outstanding art, with works by brilliant masters such as Gaudi or Miquel Barceló. In this temple, twice a year, on 2 February and 11 November, the „eight effect“ is visible, with the interplay of its two Gothic and light rosettes with the light - quite a surprise for visitors and residents, full of tradition and religiousness. But children are also main actors: there are workshops for children and for families, guided tours and exhibitions (visitas@catedraldemallorca.org).

Do not miss the opportunity to enjoy this architectural treasure with your family. Guided tours are also organised on the terraces of the Cathedral from May to October.

The history of this building is, frankly, extremely interesting. At first it was an orphanage with a chapel; later, in the 16th century, it was converted into a small church. Finally, the present temple dates back to the 19th century and has a larger scale than its previous buildings... Its past as an orphanage can be seen in the side chapel: next to the painting of the Three Kings is a picture of the Mare de Déu dels Orfàns (Our Lady of the Orphans) In the chapel on the opposite side you can see the Christ of the sailors.

Beaches and bathing areas

Mallorca is one of the most important tourist destinations for beach tourism, and this can be clearly seen. Hardly anything is more fun for children and adults than spending a day at the beach and enjoying the sun, sea and sand. The fun starts in the nearby beaches of Palma!

BEACHES

HUGO MANUEL MATOS ANDRÉS

› Can Pere Antoni

It is the nearest urban beach to the city of Palma. It is always very lively and stretches for about 750 metres long and 20 metres wide. Its proximity to the city makes it the ideal place for a nice and pleasant walk by the sea, complemented by spectacular views of the bay of Palma. It is also the only beach from which you can enjoy a fantastic panoramic view of Palma Cathedral. On summer days, when the beach is perfect for swimming, walking, resting, eating out... it becomes an attractive space open to everyone in the afternoon. Here you can meet friends to play beach volleyball, families to go for a walk, cyclists,

runners, yoga groups...

And of course, you can admire the beautiful sunsets.

In the high season it offers all kinds of services: Lifeguards, deckchairs and parasols rentals and amphibious chairs for disabled people and people with reduced mobility. It also has a wide range of bars and restaurants, including three old grain mills converted into restaurants and chill-out restaurants.

➔ **HOW TO FIND THE BEACH:** The beach is less than 2 kilometres from the centre and can be reached on foot; by bicycle along the cycle path (BiciPalma Portitxol stop); city bus, line 35, Portitxol stop; or by car (free parking with 60 places).

Two kilometres long there are many small coves with a family atmosphere, perfect for swimming or sun and peace on the sand. On the other hand, in the El Molinar area, you can also enjoy the cuisine, because in addition to the coves, the beach offers a large number of bars and restaurants for lunch or dinner directly by the sea. And after a good meal, where you can get to know the gastronomy of Palma and the Balearic Islands, there is nothing better than a walk along the promenade. The sunsets are incomparable.

Discover the wonderful gardens of Raixa and Alfàbia. The Raixa Gardens are located in Bunyola. They are of Arabic origin and have grown and developed. They contain archaeological finds that offer a surprising glimpse into history. (www.raixa.net). The Alfàbia Gardens are also of Arabic origin. Its houses are Gothic, with a distinct rural and fortified character. A tower was built in the 16th century and in the 18th century the baroque elements that now characterise the buildings were added. A day in the Archipiélago de Cabrera National Park

Would you like to take a boat trip to a small island to enjoy the sea and beautiful landscapes? Do not hesitate! Cabrera is your destination. The Archipiélago de Cabrera National Park is made up of 19 islets located just ten kilometres from the coast of Mallorca and its waters. This small and beautiful group of islets was declared a National Park in 1991, and since that year the archipelago has remained practically intact. On the islands, nature is the mistress. But the islands can be visited with due respect. The surprises of this unforgettable day

start right at the beginning. The best way to get to the island of Cabrera is by one of the boats that leave every day from Colonia de Sant Jordi during the summer. Upon arrival, the visitor can discover the flora and fauna on land and in the water, while enjoying the sun and the breeze. You can enjoy truly beautiful coves and beaches. After a refreshing swim, you can take different hiking routes or discover the history of the island. It has a lot to offer the visitor. The island is a true

paradise for children, who can get in touch with nature and experience a thousand and one adventures in a protected natural area. The highlight is a boat trip to the famous "Cueva Azul" (Blue Grotto).

Ruta del Barro de Pórtol (Clay Route)

An interesting and enjoyable day in the Palma area is to get to know its pottery tradition and see how this craft has developed over the last 300 years. You can visit different places, and also get to know the Museu del Fang (Clay Museum). In Marratxí you will find the Pórtol and Sa Cabaneta villages. Here the tradition

of pottery is still alive, and the red and white clay combine to create filigree ceramic pieces. Pots, vases, plates ... These proposals include the famous siurells, musical instruments with clay figures with a pipe characteristic of the popular ceramics of Mallorca. You will learn how they are made: after drying in the oven, they are painted white and then they are given green and red lines. Siurells can be from a few centimetres to over a metre in size and generally represent human figures, animals, or mythical creatures. The route starts at the Museu del Fang (Clay Museum), where you can learn all about this craft. The museum is located in a restored mill - Molí de Sa Cabaneta - and focuses on the traditional pottery of the island. Afterwards you can visit the recommended pottery workshops: Can Bernadí Nou, Ca Madò Bet, la Escuela Municipal de Cerámica, Son

Ros Abelló 45, Sa Roca Llisa 24, Ca Na Margalida, Sa Roca Llisa P26, Can Vent, Cas Canonge, Ca n'Antònia, Pere Coll, L'Abelló-Es Porxet, Sa Penya, Ca Bernadí and Can Vich.

Archaeological heritage

History, archaeology, culture, art, society... Mallorca has an extensive archaeological heritage of the pre-Talayotic and Talayotic period (before our era), which extends over the entire island. A very interesting proposal for the whole family is a visit to the various finds. The most important Proposals, which are located near Palma, are the archaeological sites of Capocorb Vell, in Llucmajor, and Puig de Sa Morisca, in Calvià. The pre-Talayotic period (2500-1400 BC) left us with few traces of buildings, but numerous burial sites: artificial caves and dolmen tombs. The Talayotic period (1300-123 B.C.) in turn left us the cyclopean monuments called talaiots. These are stone buildings with

thout mortar, with a central chamber, an entrance, and, in general, a pillar to support the ceiling. Usually the stone slabs of the ceilings have disappeared. The archaeological site of Capocorb Vell, in Llucmajor, is one of the best preserved and largest Talayotic settlements on Mallorca. The first excavations were undertaken as early as 1918. The site consists of several talaiots with several chambers. The Puig de Sa Morisca site is the most important prehistoric site in Calvià. The site enjoyed intensive relations and exchange with the Phoenicians. Its cultural and historical value is invaluable, as is its interest.
